

Step-1

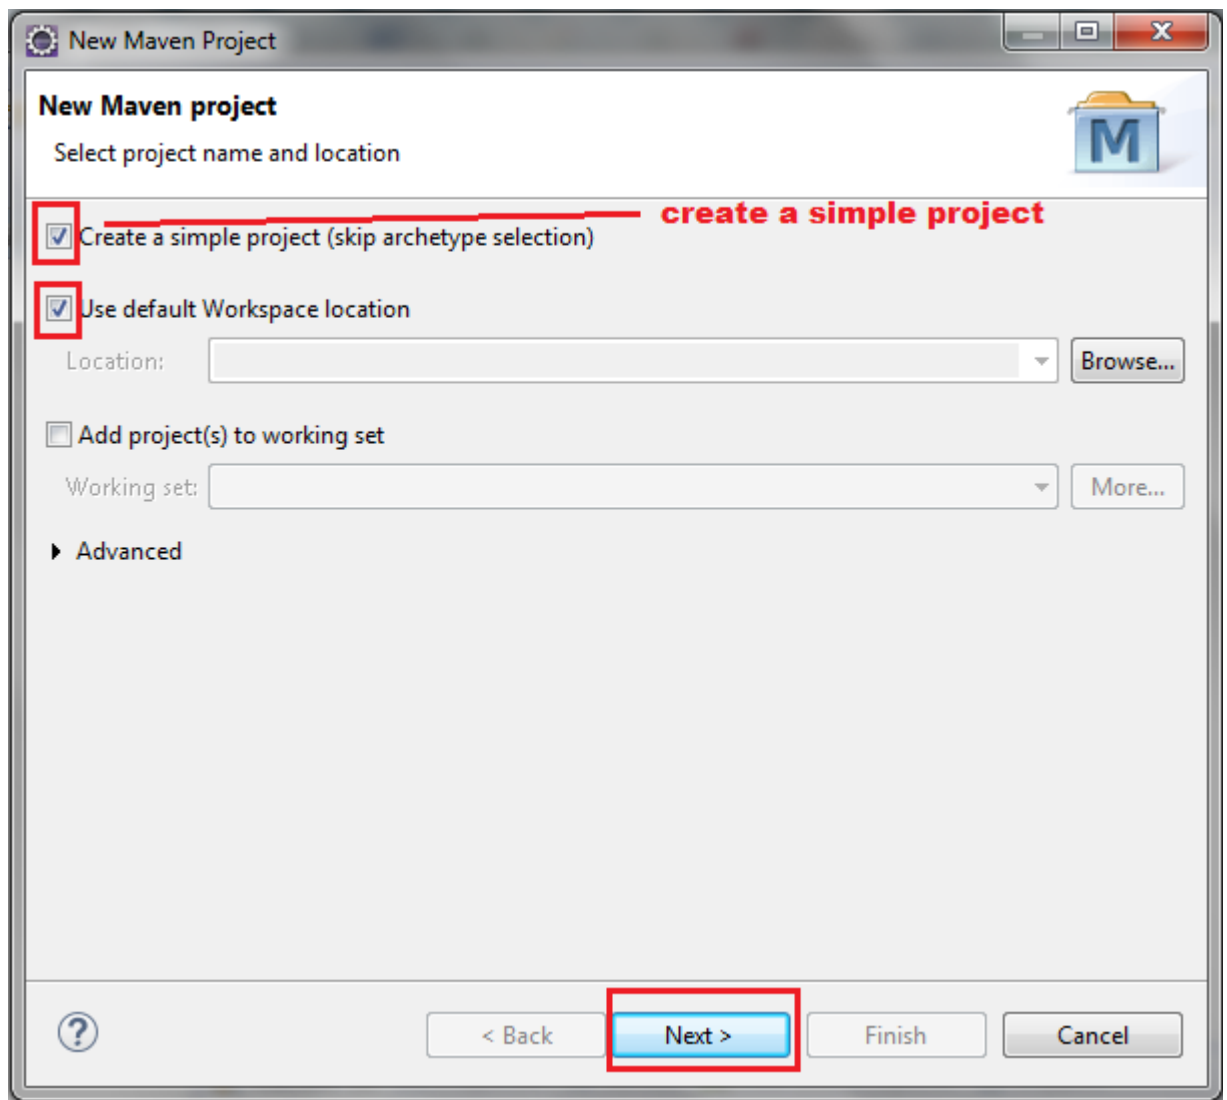

- Open Eclipse
- Click on *File* -> *New* -> *Maven Project*

Step-2

Click on Checkbox for both

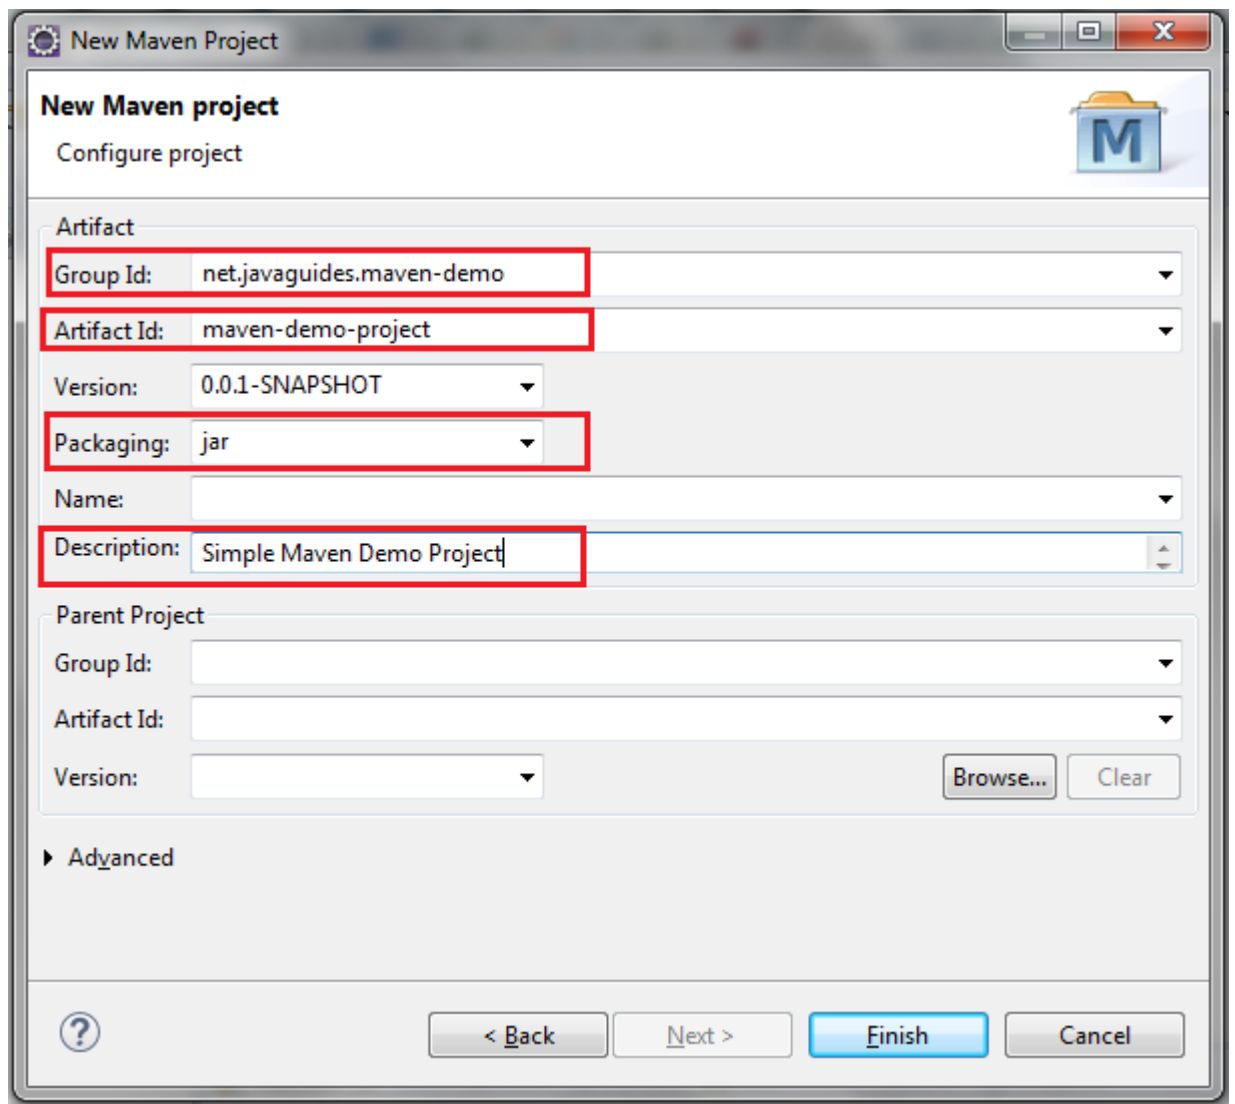

- Create a simple project
- Use default Workspace location
- Click on next button

Step-3

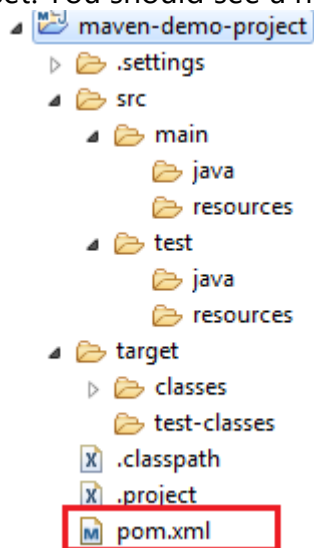

Provide GroupId and ArtifactId in next screen.

- **GroupId:** net.javaguides.maven-demo
- **Artifact Id:** maven-demo-project
- **Name:** maven-demo-project
- **Description:** Simple Maven Demo Project

Step-4

And you are all set. You should see a new Project in Eclipse with below structure.

**Maven default
directory structure**
